Cyber Resilience Act readiness

Regulation (EU) 2024/2847 (CRA)

The **EU Cyber Resilience Act (CRA), Regulation (EU) 2024/2847**, sets cybersecurity requirements for products with digital elements placed on the EU market. Its reporting obligations apply from 11 September 2026 and its main obligations from 11 December 2027.

Certain Oras Group products — such as connected / Bluetooth faucets and our companion apps — are likely to qualify as "products with digital elements" under the CRA. Oras Group is committed to meeting the applicable CRA requirements for these products by the dates on which they apply.

Security by design

We are developing our connected products to meet the CRA's essential cybersecurity requirements (Annex I) — including secure configuration, protection of data, access control and minimisation of the attack surface.

Vulnerability handling and updates

We are establishing vulnerability-handling processes — including a software bill of materials (SBOM), a coordinated vulnerability disclosure policy with a public contact point, and a secure mechanism to deliver security updates to deployed products over a defined support period, which we will set and publish for each product. From 11 September 2026, we will report actively exploited vulnerabilities and severe incidents involving these products to ENISA and the relevant CSIRT, as required.

Conformity

Our products with digital elements are CE-marked and carry an EU Declaration of Conformity under the EU legislation applicable to them — for radio equipment such as connected/Bluetooth faucets this is the Radio Equipment Directive (2014/53/EU), which covers their EMC and safety aspects, together with the RoHS Directive. We are determining each product's CRA conformity class (default, important or critical), which sets the applicable assessment route; as the CRA's requirements take effect, we will extend the conformity assessment and CE marking to cover its cybersecurity requirements.

Oras Group monitors the CRA's implementing acts and harmonised standards and is preparing its connected products and processes ahead of the 11 December 2027 application date.

This statement reflects Oras Group's preparations as of 23 June 2026 and will be updated as the CRA's implementing acts, standards and application dates are finalised. It does not constitute a Declaration of Conformity.
