Compliance with the EU Deforestation Regulation

Regulation (EU) 2023/1115 (EUDR)

Oras Group, as a downstream trader, manufacturer, and distributor of sanitary products and bathroom furniture, is fully committed to complying with the requirements of the **EU Deforestation Regulation (EUDR) (EU) 2023/1115**, including its subsequent amendments and delayed application timeline.

The **wood-based materials** incorporated into our products — such as cardboard packaging, paper manuals, and wooden components used by our furniture manufacturers — are sourced through our supplier due-diligence programme. As the EUDR obligations take effect (application from 30 December 2026 for large and medium operators, with a later date for micro and small enterprises), we are working with our suppliers to obtain the required Due Diligence Statements (DDS) — including the associated reference and verification numbers from the EU Information System (TRACES) — together with risk assessments and traceability documentation.

As a **downstream trader and manufacturer**, Oras Group does not harvest or first place any relevant wood commodities on the EU market; rather, we rely on our upstream partners to ensure that materials used are **legally harvested, deforestation-free**, and obtained in accordance with applicable legislation – including environmental, labor, and human rights standards.

Our compliance system is supported by **supplier declarations, third-party certifications, and internal audits**. Packaging and manuals are solely used to protect and accompany our products and are not marketed as standalone items.

Based on the information currently available to us, Oras Group does not place natural rubber, or products consisting of natural rubber, on the EU market as a relevant commodity under the EUDR.

We continuously monitor updates to the EUDR and related EU legislation to ensure ongoing compliance and to uphold the highest standards of environmental and social responsibility.
