

Validity of Certificates

Certificates / type approvals are issued for the **basic variants with chrome-plated surface**. Colour-suffix variants are covered by the basic variant's certificate, as the surface finish does not affect the certified properties. Flow-rate-suffix variants are covered where the certified properties do not depend on the flow rate; where an approval is flow-specific, the relevant flow variant is certified accordingly.

Colour suffixes

Suffix	Finish
-33	Matt black
-80	Brushed steel
-81	Brushed bronze

Flow-rate suffixes

Suffix	Flow
-102	1,7 l/min
-104	3,4 l/min
-105	4,2 l/min
-106	6,0 l/min
-109	9,0 l/min

Example

Certified sales item **1510F** — the certificate is valid for: 1510F, 1510F-33, 1510F-105, 1510F-105-33.
